Announcing the 2019 Gordon Research Conference on:

Micro and Nano-scale Phase Change Heat Transfer

The Effects of Hydrodynamic, Interfacial and Intermolecular Forces on Phase Change Processes

Date and Location:

February 3 - 8, 2019
Renaissance Tuscany Il Ciocco
Via Giovanni Pascoli
Lucca (Barga), IT

Organizers:

Chair: Joel Plawsky; Jungho Kim
Vice Chair: Vladimir Ajaev; Ying sun

Meeting Description:

We seek to understand phase change processes occurring at micro and nanoscales and how that influences what occurs at macroscopic scales.

Selected Topics and Speakers:

Adsorption and Phase Change (Evelyn Wang)
Phase Change in Nanoconfined Systems (Michael Strano)
Simulation and Modeling (Stephane Zaleski)

Associated Gordon Research Seminar (GRS):

This GRC will be held in conjunction with the "Micro and Nanoscale Phase Change Heat Transfer (GRS)", a program specifically designed to highlight the work of young researchers.

More details and online application are available at:
