

LIFE AT THE INTERFACE OF SCIENCE + ENGINEERING

lecture series

featuring **Dr. Phillip A. Sharp**
Nobel Laureate
Institute Professor Emeritus, MIT

10th Anniversary Lecture
**Discovery in Life Sciences:
Biotechnology and Convergence
with Engineering**

Friday, February 14, 2025 | 1:00 PM
Boston, MA | Hynes Convention Center

*You are cordially invited to attend the lecture
and a private reception to follow, at no cost.*
Please RSVP in advance [here](#).

The *Life at the Interface of Science and Engineering Endowed Lecture Series* is a joint collaboration between University of Albany (UAlbany) and Rensselaer Polytechnic Institute (RPI). Conceived by Dr. Georges Belfort and Dr. Marlene Belfort, this series addresses fundamental questions that require the expertise of both Life Sciences and Engineering, and brings world renowned experts to speak to the campus communities at both UAlbany and RPI. On its 10th anniversary, the lecture will be held at the AAAS Annual Meeting - the first time it has done so.

Previous speakers

2024 | **Patrick O. Brown**,
Stanford University

2023 | **Nobel Laureate
David Baker**, University of
Washington

2022 | **Melissa J. Moore**,
Moderna

2022 | **Robert S. Langer**,
Massachusetts Institute of
Technology

2021 | **Nobel Laureate
Jennifer A. Doudna**,
UC Berkeley

2021 | **Stephen R. Quake**,
Stanford University

2019 | **David R. Liu**, Harvard
University

2018 | **Nobel Laureate
Frances Arnold**, Caltech

2017 | **Karl Deisseroth**,
Stanford University

2016 | **Nobel Laureate
Thomas Cech**,
University of Colorado

Rensselaer
